

SUPPLIERS LIST – as of October 11, 2023

COMPANY	ACTIVITY	LOGO	COUNTRY
Airtech	Manufacturer of vacuum bagging & composites tooling materials for prepreg/autoclave, resin infusion & wet lay up processes up to 426°C		Luxembourg
Aptco Technologies	We manufacture and distribute testing and sample preparation equipment for laboratories. COMPCUT are advanced composite saws and precision composites routers to do your own mechanical testing.		Belgium
AZL Aachen	Excellence in lightweight production, partner for your innovations, one stop shop for technology know how, support in the value chain, the development, benchmarking and improvement of design technologies		Germany
Base Materials	Manufacturer of syntactic materials, including epoxy and polyurethane tooling boards for the manufacture of composite tools and parts		United Kingdom
Bekum Service	LFT pultrusion systems for granules and semi-finished products bars, rods and profiles based on the technical plastic PP PA PLA PEEK		Germany
Blacks	Manufacturing of Fiber Reinforced Composite Parts		Italy
Braca-sport	UD carbon fabrics called UniDry for hand lamination and UD Prepreg called UniPreg, wide range of use eg construction reinforcement, sport industry, car manufacturers		Lithuania
BÜFA Composites	Distributor of polyester Specialties (gelcoats, resins, reinforcements, fire retardant, bonding paste, pigment pastes, core materials, accelerators, hardeners..)		Austria
CARBOCON	Leading independent service provider in the field of carbon reinforced concrete.		Germany
Chomarat	Glass / Carbon Reinforcements		France
COMEC Innovative	Special machines manufacturer for composite materials		Italy

COMPPAIR	Self-healing composites, ultra fast repair of several damages in composite structure extending lifetime and reducing CO2 emissions, prepregs with different fibers and architecture		Switzerland
CUBES	Patented technology for the production of near net shape casting models which reduces production costs and guarantees highest material quality		Austria
DIEFFENBACHER	Leading manufacturer of press systems and complete production plants for the composite industry, technologies like SMC, LFT D/ GMT, welt molding, and hydraulic presses as a core element		Germany
Elantas	Speciality Chemicals, formulating polyurethane epoxy and silicone resins		Germany
Fiberior	Our mission is to revolutionize the production of fiber-thermoplastic composites with our new manufacturing process. The goal is to significantly reduce the production costs of continuous fiber-reinforced composites so that the advantages of these materials can be used cost-effectively for our customers.		Germany
FK Group	Solutions for cutting composite materials		Italy
FRIMO Innovative Technologies GmbH	Tooling machinery and turnkey production equipment for all plastic processing industries PU processing, Flexible Trimming, Punching, Pressing / Forming, Thermoforming, Press Laminating, Edgelifolding. Support Customers from Engineering to After sales, provide sustainable solutions for lightweight construction, e-mobility and batteries		Germany
GE. FIM	Production and distribution of consumables for the composites market in marine, wind, aerospace and automotive markets. Foam kitting, plugs and moulds, fiberglass parts construction		Italy
Gunnar	Digital cutting and cutting room automation for composites and technical textiles		Switzerland
Hauschild	Producer of Centrifugal Mixing Machines		Germany
HG GRIMME	Cutting-edge developments		Germany
Holy Technologies	We are developing the world's first carbon fiber technology that makes components fully upcyclable. With our Infinite Component platform, we help innovators with the problem of making their carbon fiber components recyclable,		Germany

	as well as to enhance their weight and production cost-efficiency.		
Hübers	Equipment and Machinery for the processing of resins in the manufacturing of composites (infusion, RTM)		Germany
Hufschmied	Development and manufacturing of process-optimizing material-related tools such as milling cutters and drills of highest precision		Germany
Isovolta	Manufacturer of prepregs, technical laminates, cut parts and decorative laminates for the aircraft interior and cargo compartment		Austria
KANEKA Belgium	Producer of liquide toughener for thermoset resins		Belgium
Kümpers Composites	High quality none crimp fabrics, woven fabrics, braid preforms based on carbon and glass fibers. Semi-finished textiles/ reforms for structural applications in composites for the automotive, aerospace and wind industry.		Germany
Langzauner	Hydraulic presses, automation solutions in the automotive, aerospace, sport, metal and wood industries		Austria
M. Swarovski	Glass filler beads are important filling and reinforcing agents. In thermoplastics, they are incorporated through compounding. Here, the purpose is primarily to optimize mechanical properties, such as rigidity, pressure resistance, heat deflection, and many other attributes		Austria
Mayer & Mayer	Structural Adhesives Manufacturing, Static Mixers and dispensing Accessories Distributing, Cartridge Dispensers Distributing, Bulk metering and dispensing equipment manufacturing, 6sigma quality approved technical expertise and DIN 6701 approved application laboratory test performance		Austria
Nippon Electric Glass Europe	Production of Glass Fiber Products		The Netherlands
Persico	Provider of equipment for automotive, Rotomoulding and marine industries		Italy
Pinette PEI	Customized equipment for composite forming HDF, RTM, thermoplastic stamping, consolidation, curing, SMC, along with handling and testing.		France
PlastFormance	Based on two international patents PlastFormance designs, crafts and distributes injection-molding compounds with unmatched		Germany

	physical properties. The granulate improves the next generation of fuel cells, helps electronics to increase live-time or shields gamma radiation replacing toxic lead.		
Saertex	Multiaxial fabrics & core materials made of from glass & carbon		Germany
SHD Composite Materials	Prepreg Manufacturer		United Kingdom
Sigmatex	Pioneer in carbon fibre textile to the composite industry. Widest array of conversion technologies available, coupled with unrivalled range of carbon fibre grades, including recycled materials innovative customised carbon textile solutions designed for performance		United Kingdom
SL Laser	Laser Protection Systems, Laser Projectors for projecting parts and layers on different tools, Positioning Systems with laser light from CAD via laser line on different tools		Germany
Solvay (Cytex Engineered Materials)	Advanced lightweight composite materials & polymers for use in demanding aerospace, automotive & energy application		United Kingdom
Stäubli	Quick mold change solution for the plastic industry, connection solutions for the automotive industry, robotic tool changer system & EOAT solutions allowing to expand the automated manufacturing processes		Germany
Vabatec	Process materials for the production of composites products, tailor-made solutions of plastic films for automotive, graphics, energy technology		Germany
Vision Composite Products	SMC Carbon fiber forged Wheels, SMC Carbon Fiber Forged Components		USA
Voidsy	Voidsy gmbh, a recent deep-tech startup, is engaged in the development and commercialization of a highly innovative, photothermal tomography system. Based on the technology presented by voidsy, the non-destructive, non-contact and imaging inspection of components can be carried out up to 80% faster and more cost-effective than with previous standard methods.		Austria
Wickert Maschinenbau	Presses for manufacturing mouldings in composites materials, automation for RTM, HP-RTM, wet-lay up, prepreg, thermoforming, compression moulding.. Presses with clamping force from <20kN to >110 000kN, presses for processing elastomer, powders, plastic and friction materials		Germany

ZÜND Österreich	Manufacturer of multi functional flatbed cutting solutions (swiss made quality)		Austria
------------------------	---	--	----------------
